Kerish Products presents Kerish Doctor 2021, the new version of integrated solution for computer care

December 30, 2020

The Russian team of the Kerish Products developers announces updating Kerish Doctor, an integrated solution for computer care, up to the 4.85 version.

The new version includes the long-awaited "Driver Update" tool containing over 100,000 device drivers. It also allows you to install device drivers "from scratch". The driver database will be updated monthly.

In addition, new tool "Driver Manager" is available for working with drivers, which allows you to create backup copies of drivers.

Added a new tool "Disk Map" for convenient analysis of disk space.

Cleaning up digital "trash" now works several times faster.

The usability of the application interface has increased: the ability to search in application has been added, as well as the ability to change the view of sections (icons/list/small list).

Existing tools has been upgraded, the number of settings has been increased, and the ability to import, export or reset program settings has been added.

Added new issues to the Real-time Failure Detection System, added new recommendations and small improvements.
